

CALL FOR APPLICATION: CROSS-BORDER POSTDOCTORIALES

A residential workshop dedicated to researchers on temporary work contracts in the French, German and Luxembourgish public sector

**Luxembourg, 6th – 9th of November 2017
Youth Hostel, 2 rue du Fort Olisy, L-2261 Luxembourg-City**

European researchers are often not well aware of the professional possibilities that are open to them outside of the public sector and feel poorly prepared to achieve a smooth transition into the business sector. Entering the latter, however, is the best way to counterbalance the negative changes in the public sector, meaning fewer permanent positions, an increase in temporary contracts and limitations of their duration.

Moreover, more than 1/3 of EU-researchers have been mobile during their postdoc phase (Researchers' Report 2014 by Deloitte). They are facing two specific challenges when they return home: on one hand, the lack of a local network to help them to identify opportunities and better know the job market; on the other hand, the career development of their spouses when they are both scientists.

That is why ABG, the Franco-German University, Luxembourg National Research Fund, the University of Luxembourg and Luxembourgish national research institutes (LIH, LISER and LIST) have joined forces to organise a seminar specifically for:

- researchers with a temporary contract in the public sector,
- researchers who are returning home after their mobility,
- researchers facing a dual career development.

This seminar, held in English, will allow them to pinpoint their specific skills, go over their work history, define their future career plan in a new perspective and efficiently communicate with recruiters in France, Germany and Luxembourg.

The seminar is based on an interactive methodology: participants are expected to be proactive during the 4 days. That is why organisers put emphasis on participants' motivation and engagement.

3-7 July	final selection of participants and confirmation of registration to selected participants
26 th July	deadline for the payment of participation fees
6 th to 9 th November	workshop

PARTNERS

ABG

Association Bernard Gregory (ABG) is a non-profit organization founded in 1980. Its mission is to bring together doctorate holders and employers. To be more specific, it helps PhD students and PhD graduates from all scientific fields to steer their career. It also helps companies recruit PhDs.

Its capacity for innovation and its customer-oriented approach result in a constant evolution of its services.

Since March 2008, a Franco-German branch office has been created to focus on researcher's mobility between France and Germany and more largely on the European level.

www.intelligence.fr

Franco-German University

The Franco-German University (FGU) consists of a group of affiliated member universities from France and Germany, the administration of which is located in Saarbrücken. It was established in 1997 as an institution under international law by means of an intergovernmental agreement (Weimar Agreement). The FGU has adopted a specialist role in Franco-German university relations with the aim of reinforcing cooperation between France and Germany in the field of higher education and research. One of the fundamental tasks of the FGU is the initiation, coordination and financing of structured study programmes at all the development levels laid down in the Bologna process. Among its research supporting tools: thesis joint supervision, Franco-German doctoral colleges, summer schools, workshops and partnerships between researchers' teams.

Luxembourg Institute of Health

The Luxembourg Institute of Health is a public research organisation at the forefront of biomedical sciences. With its strong expertise in population health, oncology, infection and immunity as well as storage and handling of biological samples, its research activities are dedicated to people's health. At the Luxembourg

Institute of Health, more than 300 individuals are working together, aiming at investigating disease mechanisms and developing new diagnostics, innovative therapies and effective tools to implement personalised medicine. The institution is the first supplier of public health information in Luxembourg, a strong cooperation partner in local and international projects and an attractive training place for ambitious early-stage researchers.

www.lih.lu

LISER

The Luxembourg Institute for Socio-Economic Research (LISER) is an independent research institute predominantly funded by the Ministry of Higher Education and Research. It is aiming at the provision of evidence based advice to society and policy makers, based on state-of-the-art scientific methodology. The research agenda of the institute is covered by three research departments: Labour Market, Living Conditions, and Urban Development and Mobility. By bringing together mostly economists, sociologists, and geographers, interdisciplinarity is used as a key element for stimulating scientific innovation. The institute is also closely collaborating with the University of Luxembourg. Via its research network, the institute attracts top level researchers from all over the world as active visitors.

Luxembourg Institute of Science and Technology

The Luxembourg Institute of Science and Technology (LIST) is an RTO (Research and Technology Organisation) active in the fields of materials, environment, and IT. It was created in January 2015 from the mutual desire of the public research centres Gabriel Lippmann and Henri Tudor, both key players in research and innovation in Luxembourg, to join forces and to focus their efforts on targeted research topics with the aim to facilitate companies' access to public research and to enhance the international visibility of the Luxembourg research and so to say a fresh momentum to the research potential in the country.

LIST's mission is to contribute to the development of Luxembourg economy and society by conducting interdisciplinary impact-driven research in targeted research areas.

LIST is working across the entire innovation chain:

- Fundamental and applied scientific research, knowledge and competences development,
- Experimental development, incubation and transfer of new technologies, competences, products, and services,
- Scientific policy support to the Luxembourg government, businesses and society in general,
- Doctoral and post-doctoral training, in partnership with universities.

University of Luxembourg

The University of Luxembourg (UL) was founded in 2003, and is, thus, one of the youngest and fast growing universities in Europe. Based at the heart of the European Union, it offers a range of high-quality programmes at all levels. The UL is an international (with an academic staff of 17 nationalities, and students from 95 nationalities), multilingual (three official languages: English, French and German) and research-led University, with a strong focus on six main areas:

- Computational Sciences
- Law, with focus on European Law
- Luxembourg School of Finance
- Educational Sciences
- Security, Reliability and Trust in Information Technology
- Systems Biomedicine

All six priorities are expected to perform highest quality basic research, but all of them should do so on projects with potential relevance for the societal and economic development of the country. The University of

Luxembourg is actively participating in multiple European projects within its areas of expertise, since the last 5 years its third party funding (including European) has grown by 29%. Beyond being such a young university, it has been successful in a number of European applications: by the beginning of 2014, the UL was already involved in 36 European projects either as a coordinator or partner.

Luxembourg National Research Fund

The Luxembourg National Research Fund (FNR) is the main funder of research activities in Luxembourg. Our vision is to establish Luxembourg as a leading knowledge-based society through science, research and innovation, thereby contributing to the country's economic diversification and future prosperity. We aim to set up a sustainable world-class research system in Luxembourg that will generate societal and economic impact in key strategic areas. To this end, the FNR invests public funds into research projects in various branches of science and humanities, with an emphasis on core strategic areas. Furthermore, the FNR supports and coordinates activities to promote scientific culture and to raise public awareness for research and science.
