THE CZECH REPUBLIC

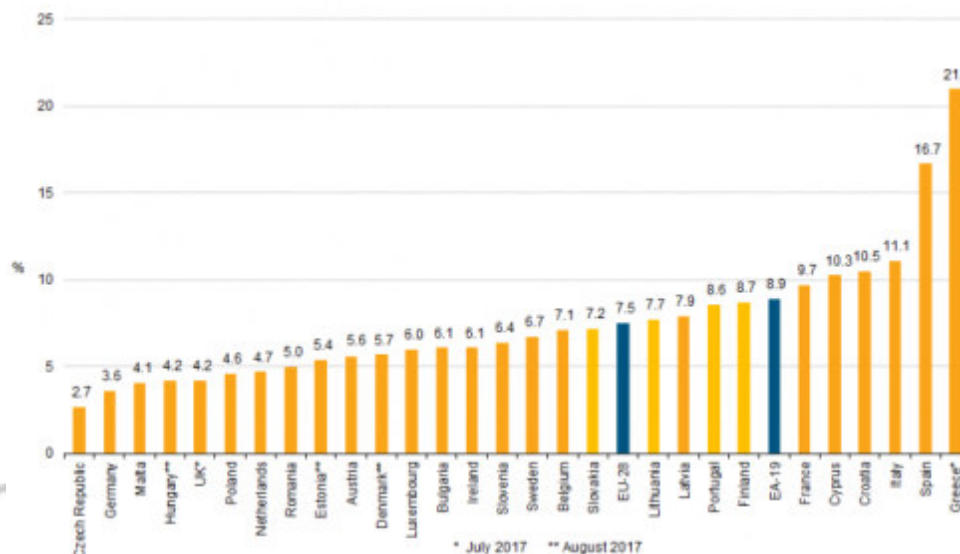

RESEARCH AND JOBS IN CZ

Huge increase in R&D spending

Gross domestic spending on R&D, % of GDP, 2000 – 2016, source OCDE

Lack of workforce

Unemployment rates, seasonally adjusted, September 2017 (%), source Eurostat

NEW RESEARCH CENTRES

European Centres of Excellence

high intensity lasers, 260 M€

nanosciences, 200 M€

BIOCEV

biosciences, 100 M€

civil nuclear, 100 M€

medical, 100 M€

supercomputer, 70 M€

RESEARCH LANDSCAPE

AVAILABLE JOBS IN RESEARCH

Úřad práce ČR

210 000 jobs available

Almost 600 jobs tag « research »

> 50 full time jobs in public research

« CZECH EMPLOI » PILOT PROJECT

Pilot phase

1. Collection and diffusion of the job offers

2. Infc dep

or to

3. Support to the

- 1 year project
- 3 target groups:
 - Service centers – French
 - Mid-management industries/services – English
 - Researchers – English
- Partners
 - Pôle Emploi/EURES
 - ABG ?

CONCLUSION

Massive investment in R&D

- To change CZ development model : from « low cost » to « high value »
- With some « rich man's problems »: operating cost of new centers; limited H2020 projects; lack of coordination (public/private research, academy of science/universities)

Lack of workforce

- Under the « full employment » level: growth of wages, main limiting factor for new investments
- Need of foreign skilled workers!

Excellent opportunity for young French professionals

- UE member: limited administrative hassle
- Very nice country: history, safety & beer
- Difficult language to learn for everyday life
