

GENOPOLE Postdoctoral Research Fellowships

2020 CALL FOR PROPOSALS

Genopole-Evry has launched a new call for proposals for a postdoctoral fellowship which enables a France-educated¹ researcher currently performing research abroad to return to France. The fellowship is intended to fund a research project in Genopole-based research laboratories or biotech companies.

The fellowship program is open to all research fields of the Genopole biocluster-Evry: genomics, bioinformatics and systems biology, proteomics, structural biology and biophysics, gene and cell therapy and regenerative medicine, applied life sciences and non-medical biotechnologies, metagenomics, biodiversity and microbial ecology, humanities and social sciences related to the above mentioned fields.

The postdoctoral fellowship is thus only available:

- to a young researcher, whether of French or other nationality, educated in France¹
- and who wishes to return to France after having performed a PhD or a post-doctoral research abroad with a view to performing a research project in a laboratory or a company located in Genopole biocluster and in one of its areas of interest.

The fellowship is strictly dedicated to the salary all charges and taxes included, for a total duration of either 18 or 24 months. Hence, The total amount is 130 000 € gross salary charged for 24 months duration ; it is reduced to 97 500 € on a prorata temporis for 18 months duration.

Whatever the duration requested by the applicant, there will be no possibility of extension.

All applications must be submitted by the host laboratory, or company where the proposed research project is to be carried out. More information² and application file are accessible [here](https://www.genopole.fr/Call-for-proposals-Postdoctoral-research-fellowships.html?lang=en) : <https://www.genopole.fr/Call-for-proposals-Postdoctoral-research-fellowships.html?lang=en>

Applications must be received by the Genopole Secretariat **by June 30th, 2020, at the latest:**
